

Course Outline – TM1 Administrator

This one-day course will discuss the operation and maintenance of the TM1 Server, including performing system administration functions, managing the server, setting up the security functions and backing out and recovering transactions.

Who should attend:

The course is designed for technical staff who will operate and maintain a TM1 server. Participants should have an in-depth knowledge of the concepts and operation of TM1.

Topics Covered:

1. TM1 Architecture

- Objectives and Basic Concepts
- The Remote Server
- The Client
- The difference between working locally vs. Client/Server

2. Operating the TM1 Server

- The Admin Server
- The Data Directory
- The TM1S.CFG file
- Starting and stopping a Server
- Remote Server memory management
- Performance tips

3. Security

- Implementing TM1 security
- Working with clients and groups
- Securing cubes, elements and dimensions
- Security tips

4. TM1 Log Files

Participants will be supplied with a course manual that has been designed to be used after the training as a valuable reference. Lunch, morning and afternoon tea is provided.
